

#### A Statement from our Company

We wish to provide important information regarding Tiger Calcium Services. The Company has been charged under the Environmental Protections and Enhancement Act as a result of allegations relating to the operations of Keg River Chemical Corp, a wholly owned subsidiary of Tiger Calcium Services Inc. The charges do not relate to Tiger Calcium Service Inc.'s calcium chloride plant, calcium chloride well, or the mining or manufacturing of calcium chloride products.

Keg River Chemical Corp.'s operations are located in Edmonton, Alberta, where it produces and packages a wide range of advanced sulfur-based products. The allegations relate to routine reporting requirements associated with groundwater monitoring wells. Groundwater monitoring is part of Keg River's standard operating procedures. All results for the Keg River location have shown the groundwater to be safe.

Tiger Calcium and Keg River Chemical Corp. are committed to the safety of our environment and we are proud of our environmental record. We take these charges very seriously and will continue to work closely with Alberta Environment. At Tiger Calcium, Quality and Service are our Priority and Safety is our Commitment.
